## Product of the Week

### **Nature's Dog by Canus - a line of goat's milk-based products**

NATURE'S DOG by Canus, a remarkable line of fresh goat's milk products, receives this week's DOG NEWS DAILY Seal of Approval. These terrific goat's milk-based products include Liquid Shampoo, Bar Shampoo, Wipes, and Treats. We tried all but the Liquid Shampoo and were very impressed with the quality of all the products as well as with the results. All of the dogs in the office loved the chicken and goat's milk treats, and they cleaned up beautifully with both the soap as well as the wipes. We washed our Wheaten Terrier with the people version of Canus's bar soap by mistake, and even that product left our dog's hair clean, soft, and shiny.

Below are the answers provided by Canus to some commonly asked questions that helps to explain the Nature's Dog line of products by Canus in greater detail. To learn even more about their products, we urge you to visit their website at [www.canusgoatmilk.com](http://www.canusgoatmilk.com).

**Why is Goat's Milk good for dog's skin?** For the same reason it is good for your skin. Goat's milk has healing, moisture-rich benefits with the right protein structure to be quickly and easily absorbed. It helps provide the necessary

vitamins, minerals and proteins needed for all-around health and wellness.

**Why is Goat's Milk good for dogs in treats?** Because goat's milk is so easy to digest. Each treat contains probiotics and enzymes for digestive health as well as chondroitin and glucosamine for joint health.

**Where are the treats manufactured?** Nature's Dog treats are manufactured using only the best ingredients and are made in Canada.

**Are the treats wheat free, soy free and corn free? Are the ingredients human grade?** Yes, yes, yes and yes. Try one and see for yourself. The treats are also preservative-free and contain no artificial coloring or flavoring and no animal by-products.

**Are Nature's Dog products safe for puppies?** Yes, because goat's milk is very gentle, little puppy tummies can handle them with ease.

**Can you use Nature's Dog grooming products on dogs with irritated (hot spots) or dry skin?** Yes, they are especially good for sensitive skin and have special botanicals to help soothe and heal hotspots. Tea Tree and Meadowfoam seed oils relieve and heal dry skin and hot spots while shea butter helps condition and bring a healthy shine to the coat.

**What is the shampoo Bar and how does that work?** It's a bar like a bar of soap but it's solid Nature's Dog shampoo! In bar form, it's easier to scrub up a good lather and clean those really dirty spots.

**How do I use the wipes?** Keep them by the door. When you come in from a muddy walk, just grab a wipe and use it to remove the dirt. They're gentle enough to use around the eyes and ears. Keep some in your car, too! Because they are pre-moistened with fresh goat's milk and conditioners, they are a great way to help maintain a shiny and clean coat between washes. You can use them anywhere your dog needs a little skin rescue including cracked pads or hot spots.
